Conditions for Agriculture Development

- Excellent conditions for the cultivation of Mediterranean plants, over 2000 species in the region of Herzegovina along with already existing processing industry and the production of pharmacological and other products
- Very long and warm summers, mild, short and rainy winters
- Establishing the Agrarian fund and subsequently the “Herzeg house“, the City Administration emphasized its commitment to the development of this branch of the economy, providing maximum support to small agricultural producers.
- The development of the irrigation system is in its final phase, after which 80% of the total arable agricultural land in the territory of the City of Trebinje will be provided with irrigation.

Agricultural Land Structure

- City area - 85,250 ha
- Ownership structure of the agricultural land:
49% state, 51% private

Hydro Potential

Hydropower Plant on the Trebišnjica River is a system consisting of 4 hydropower plants. The total installed capacity is 404 MW.

They are as follows:

“HPP Trebinje 1“.

”HPP Trebinje 2“

”HPP Dubrovnik

“PSHPP Čapljina”

”HPP Dabar“ is under construction. It will be the first hydropower plant within the ”Upper Horizons” project.

Solar Energy

Natural conditions for the use of “green” energy sources:

- 260 sunny days per year
- The Power Utility of the RS strives to develop the “green” energy from renewable sources because it will face the obligation to pay environmental tax for carbon dioxide emission in the following years, which will possibly raise the price of electricity.
- large area of the Zubci plateau suitable for the construction of solar power plants
- In this area, on the surface of 120 ha, the largest powerplant of this type in the Balkans “Trebinje 1” is being built. Its capacity is 73 MW and an investment value around 100 million BAM.

Investment Benefits

Business premises lease:

I zone 16 KM/m²
II zone 12 KM/m²
III zone 9 KM/m²

Municipal building land development costs in 2023

I zone 118.18 KM/m²
II zone 109.74 KM/m²
III zone 101.29 KM/m²
IV zone 84.42 KM/m²
V zone 67.54 KM/m²
VI zone 50.65 KM/m²
